

## CHAPTER V

### CONCLUSION AND SUGGESTION

The present study, attempting to know the correlation between students' attitude and their English achievement for first grade at SMA Negeri 01 Rejotangan. Therefore, this section provides the conclusion drawn from the data analysis and some suggestions for the institution, English teacher, students and the further researchers.

#### A. Conclusion

As has been established that through result of questionnaire and score of English achievement, it showed that the hypothesis has a positive correlation between students' attitude and their English achievement for first grade at SMA Negeri 01 Rejotangan. The result of the correlation between students' attitude and their English achievement gotten by first distributing questionnaire which to know how far the students' attitude in learning English at SMA Negeri 01 Rejotangan. Second, by documentation that consist of list and score of students in order to know the students' achievement in English.

As the researcher investigated, she found that the students' attitude in learning English were good. It can be seen from the result of the questionnaire about the students' attitude in English and the English score of students that have been analyzed. The statistical analysis using SPSS 16.0 showed that the correlation coefficient of this case is 0.690. While the significant (2-tailed) value 0.000. According to the sig (2-tailed) value 0.000 is lower than level of

significant ( $\alpha$ ) 1%. And the correlation coefficient 0.690 is higher than level of significant ( $\alpha$ ) 5%. We can be concluded that the alternative hypothesis ( $H_a$ ) is accepted and automatically the null hypothesis ( $H_o$ ) is rejected. It means that there is a significant correlation between the students' attitude and their English achievement for first grade at SMA Negeri 01 Rejotangan. Therefore, the students' attitude is importance aspect for increasing the students' achievement especially in English.

## **B. Suggestion**

This research had proven that the students' attitude and their English achievement had positive correlation. Then, in accordance to the significant of the research, the research tries to give some suggestions for the readers, especially:

### 1. The institution

The suggestion for the institution, in this case SMA Negeri 01 Rejotangan. The researcher hopes this research may give positive input for the institution to improve the quality of students' attitude and their English achievement in the institution can be increased.

### 2. The English teacher

To get the maximal learning in the school, the teacher needs to look at the students' attitude for improving the learning activity. So the students can improve their achievement especially in English. The researcher hopes

that the result of this study can be useful for the teacher as one of the resources in teaching English which is can applied in the future.

3. The English students

To get the well future, the students should to pay attention on their attitude, so the students will get the better science and be good students. The researcher hopes that this research may useful for English students to improve the students' motivation to learn about attitude. And don't forget to always pray to Allah SWT.

4. The further researcher

As this research is not perfect yet. There is some mistakes since conducting this research. It is suggested to the further researcher when conduct next research in the same field, especially in the students' attitude and achievement in English. The improvement can done through the method of research and get a satisfying result, but it will be better if the next researcher show the other relevant factors of achievement and apply it with the varieties method. The researcher hopes that the result of the research can become the useful information and references for the next researcher who want to conduct the similar research.
